

Atif Moin

Senior Software Engineer (Frontend)

atifmoin19@gmail.com | 7007136187 | Portfolio | GitHub | LinkedIn

Summary

Senior Software Engineer (Frontend) with 3 years of experience building scalable fintech and AI-driven applications using React, Next.js, and TypeScript. Specialized in performance optimization, reusable component architecture, LLM integration, and frontend-backend integration using FastAPI, PostgreSQL, and WebSockets.

Skills

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, Next.js, Redux Toolkit, RTK Query

Backend: FastAPI, REST APIs, WebSockets, Redis

Database: PostgreSQL, SQLAlchemy, Alembic

AI/LLM: Groq API, Gemini API, Smallest.ai, Llama 3.3 70B, Prompt Engineering

UI: Tailwind CSS, Chakra UI, Material UI

Tools: Git, JIRA, Axios, Docker, Claude Code (AI-assisted development)

Other: PWA, Performance Optimization, CSP, AES Encryption

Experience

Senior Software Engineer (Frontend)

2023 – Present

Zopper, Noida

- Led end-to-end development of scalable React applications for fintech platforms, from requirement gathering to production deployment, increasing development speed by **30%**.
- Designed reusable component systems, reducing duplicate effort by **40%**.
- Optimized large data rendering, reducing UI lag by **25%**.
- Defined component architecture and design patterns improving the scalability and maintainability of frontend systems.
- Built and integrated REST APIs using **FastAPI**, and managed backend data using **SQL**.
- Improved performance on low-end devices, reducing latency by **20%**.
- Collaborated with cross-functional teams to drive architectural and product decisions.

Projects

Zenova – AI Agent Orchestration Platform

React, TypeScript, FastAPI, PostgreSQL, Redis, WebSockets, Groq (Llama 3.3 70B), Gemini 2.5 Flash, Smallest.ai

- Built full-stack multi-tenant AI platform for insurance operations — automating outbound voice calls, email campaigns, and renewal workflows across multiple banking clients (Axis Bank, Ujjivan Bank, Star Health).
- Integrated **Groq API (Llama 3.3 70B)** with **Google Gemini 2.5 Flash** auto-fallback for AI chat, transcript analysis, KPI entity extraction, and intent detection with multi-key rotation on rate limits.
- Integrated **Smallest.ai** voice AI API to trigger automated outbound calls; streamed live call transcripts to UI in real time via **WebSockets**.
- Designed **PostgreSQL** multi-tenant schema isolation (per-org schema) using **SQLAlchemy** ORM and **Alembic** migrations; **Redis**-backed WebSocket connection manager for real-time pub/sub.
- Architected multi-agent mission registry (30+ agents, 100+ missions) with **JWT**-based role access control supporting configurable agent types across 5+ insurance workflows.
- Built real-time nudge system pushing live sales cues to field agents during active calls via WebSocket, improving upsell response rates.
- Leveraged **Claude Code** (Anthropic) as AI pair-programmer throughout development — accelerating architecture decisions, debugging, and feature implementation.

Zopper UI – React Component Library

React, TypeScript

- Built reusable UI components improving development efficiency by **40%**.
- Delivered features used across multiple production applications in fintech domain.
- Designed a scalable design system ensuring UI consistency across products.

EmailTemplateFlow – No-Code Builder

React, TypeScript

- Built drag-and-drop email builder reducing creation time by **60%**.
- Solved cross-client rendering issues (Outlook, Gmail) with structured email architecture.

Interesting UI – Animation Library

Next.js, GSAP, Framer Motion

- Developed 40+ high-performance animated components achieving **60 FPS**.

Open Source

smart-virtual-scroll: Improved list rendering performance by **80%** using virtualization; reduced DOM nodes and memory usage.

vite-pwa-updater: Built plug-and-play PWA update manager with background update detection and non-blocking UI notifications.

Education

B.Tech in Computer Science
Inderprastha Engineering College

2019 – 2023
